

ALUBE

TECHNICAL SHEET

Aluminum Cleaner and Brightener

ALUBE is a washing product for noble metals such as copper, aluminium, chrome, magnesium, stainless steel, etc. Product based on acids, it whitens surfaces. Excellent product for washing heavily stained metals. Excellent for the maintenance of trailers, it can be used in automotive maintenance and accessories as well as in industry. Used in boat aesthetics, allows easy cleaning of algae and limestone on the hull. We do not recommend washing directly in water or near water as this product may be harmful to aquatic life. Biodegradable.

Manual

- 1- Spray the surface to be cleaned (directly or diluted 1 to 2 times)
 - 2- Wait 1 minute
 - 3- If the dirt is extreme, rub
 - 4- Rinse well with water afterwards
 - 5- Neutralize with a degreaser to prevent corrosion
- Note: Always test on a small area to check if the product is suitable.

Conditioning

Packaging: 1 liter spray bottle (MAL2)
4 liter container (MAL3)

Technical data

Physical state	Liquid
Odor	None
Detectable density	1.1-1.2 g/ml
Viscosity	Similar to water
pH	>2

Precautions

Corrosive! Do not mix with a strong base. Do not smoke and do not eat during handling. Do not breathe vapors and mists. Use only outdoors or in a well-ventilated area. Wash thoroughly after handling. Wear safety glasses or a visor (face shield) when there is a possibility of splashing. Wear an adequate mask if the concentration in the air exceeds the VEMP.

Storage

Corrosive liquid, it must be stored according to the provisions of the CNPI and the ROHS. Store in a tightly closed container, clearly marked with its contents, in a cool, dry, well-ventilated area, away from bases, combustible materials and other incompatible products. Store in an area with a corrosion-resistant cement floor. Reservoirs and vats of corrosive liquids must be fitted with an overflow prevention device. Attacks certain metals and certain types of plastic or rubber and glass. Polytetrafluoroethylene (Teflon®) resists.
