

STANALU

TECHNICAL SHEET

Cleaner for stainless steel and aluminum

Stanalu is a washing product for noble metals such as copper, aluminium, chromium, magnesium, stainless steel, etc. Acid-based product that does not whiten surfaces if they have not been acid-washed. It removes all traces of rust and other stains from stainless steel and restores its original appearance.

Manual

- 1- Spray a fine mist on the dry surface to be cleaned (Aluminium, Steel stainless steel, chrome or other painted metal surface)
- 2- Pass a soaking mitt over the surface to spread the product evenly
- 3- Leave to act for 3 to 4 minutes
- 4- Rinse thoroughly so that no product residue remains. If you use a pressure machine, put the nozzle as close as possible. Hot water rinse gives better results.

Conditioning

Packaging: 1 liter spray bottle (MAL2)
4 liter container (MAL3)

Technical data

Physical state	Liquid
Odor	Mild
Detectable density	1.1-1.2 G/ML
Viscosity	Similar to water
Ph	Acid close to 2.0

Precautions

Wear gloves, mask and safety glasses or visors when handling. Obtain instructions before use. Do not handle until all safety precautions have been read and understood. Do not smoke and do not eat during handling. Do not breathe vapors and mists. Use only outdoors or in a well-ventilated area. Wash thoroughly after handling. Dispose of contents and container in accordance with local regulations.

Storage

Corrosive liquid, it must be stored according to the provisions of the CNPI and the ROHS. Store in a container kept closed, bearing a clear identification of its contents, placed in a cool, dry and well-ventilated place, away from bases and other incompatible products. Store in an area with a corrosion-resistant cement floor. Attacks certain metals and certain types of plastic or rubber and glass. Polytetrafluoroethylene (Teflon®) resists. Keep locked up.
