GPU COMPATIBILITY
Ghost S1 MkIII

FITTING THE GRAPHICS POWER YOU NEED

The Ghost S1 MkIII has a maximum graphics card support of up to:

2.1-Slot: 145 (H) x 45 (W) x 305 (D) mm

Even though your GPU is within the measurements above, it might be challenging to fit due to PCIe power feed placement or GPU measurements being specified differently. This list has been comprised to show you what GPUs do fit into the Ghost S1 and what limitations you might encounter with them. For obvious reasons we cannot test all cards on the market, but our ambition is to test as many as possible and to extend this list of compatible GPUs. We are hoping you can help us to further develop this document.
