Adjustable Queen Bed

User Guide

LFADJSBEDQ
Thank you for purchasing the LiveFine adjustable bed. This User Guide is intended to provide you with guidelines to ensure that operation of this product is safe and does not pose risk to the user. Any use that does not conform to the guidelines described in this User Guide may void the limited warranty.

Please read all directions before using the product and retain this guide for reference.

This product is intended for household use only. This product is covered by a limited one-year warranty. Coverage is subject to limits and exclusions. See warranty for details.

• Zero gravity position
• Programmable memory
• Height-adjustable legs: 8", 10", 11.5", 14.5"
• Dual USB ports
• Under-bed lights
• Mattress rail
• Emergency reset button

Safety Precautions
• Use this product only for its intended purpose.
• Close supervision is necessary when this product is used by or near children or handicapped individuals.
• Never operate this product if it has a damaged cord or plug, or is not working properly.
• Keep the product, remote control, wires and power supply away from heat.
• Do not use this product in a humid environment. The connector part of the wire, and the gap between the motor and the control box, cannot be exposed to liquid or high humidity.
• Never use this product as a substitute for medical attention or treatment.
• Consult your physician if you have any questions regarding the use of this product.
• Do not use this product to treat any unexplained pain before consulting your physician.
• Stop using the product if you experience pain or swelling.
• Always unplug the product before attaching or detaching any parts or cleaning it.
• Unplug the power cord and remove the remote control battery when the product is not used for a prolonged period of time.
• Do not let children play with or operate this product.
• Do not allow children or pets underneath the bed.

4 center leg gaskets

NEED HELP?
If you experience any problems with your LiveFine® adjustable bed, please contact us at supportlfc@camarketing.com or 888-390-7622 before returning your product to the place of purchase.

WE'RE HERE TO HELP!
Assembly

1. Lay the carton flat on the floor and carefully cut open.
2. Lift carton so that the open side faces down and slide it up and off the bed. Place bed upside-down flat on the floor.
3. Remove and discard plastic bag. Put together the two pieces of the bed and align them flat on the floor.
4. Open all the parts boxes and cut the zip ties. Take out the mattress rail. Check that you have all the necessary parts according to the parts list.
5. **Corner leg assembly:** Push screw through triangular brace piece from underneath. Screw in the leg and tighten.

6. **Center leg assembly:** Place leg so that it bridges the 2 sections of the bed. Note: It may be helpful to have another person squeeze both pieces together so that screws may be tightened properly. Place gasket on long screw. Screw leg into place with Allen wrench.

7. Connect the massage and the leg motor connectors to the corresponding interfaces on the controller.

8. Connect the wire (on the bed) with the 3-pin plug to the DC extension cable. Plug the other end of the DC cable into the switch's power jack.
   Connect the 8-wire plug of the AC power cable to the other jack on the switch's power supply.
   Connect the AC power cable to your nearby power outlet.

9. Insert batteries into the remote control. Press the first button. If the motor begins to run, unplug the power supply and turn the bed over to its right side-up position. If the motor does not run, it needs to recode.
   **Coding method:** Press and hold the black button of the controller to light up the green light. Release when green light flashes. Press and hold the first and third buttons of the controller. Release them when blue backlight flashes.

10. Install the mattress rail at the foot of the bed.
1. Press the FLAT button to reset the bed.

2. Adjust the bed to your preferred position.

3. Press and hold the TIMER/ALL OFF button. Release the button when you see the blue backlight flashing on the remote control (in about 3 seconds).

4. Press the Memory A or Memory B button. The blue light will stop flashing to indicate that the setting has been successfully programmed.

5. (Repeat the process for a second setting.)

6. To activate your setting, press the corresponding Memory button when you next use the bed.

**Dual USB Charging Ports**

Located on the right side of the bed, 2 convenient USB ports let you charge your portable devices.

**Emergency Reset**

If you temporarily cannot reach the remote control, press the red emergency reset button to return the backrest and legs to their lowest positions.
Troubleshooting
If you experience problems with your adjustable bed, please follow these steps:
Press any button on the remote control to see whether the blue backlight is bright. If it is dim or does not light, check the battery.
Check the green power indicator light on the switch. If it is not lighted, check the power outlet.
Check for loose wires or connectors. Press the black button on the remote control to see whether the green light turns on to confirm that the controller is powered up.
If the USB charger does not charge properly, check if its blue backlight is on. If it is not, follow steps 2 and 3 above. If the blue light is on, but your device is still not charging, check your cables and equipment.

Specifications
This product's wireless device complies with FCC certification standards.
Input voltage: AC 100 – 240V, 50/60HZ
Output: DC 29V, 1.8A
Dimensions: 80” x 60” x 14.5”
Height adjustments: 8”, 10.5”, 11.5”, 14.5”
