Elevate your environment with the NanoLumens Engage Series™. This flat-panel display series was created to give customers our simplest -and slimmest- solution yet. Ideal for viewing environments where distance is small and expectations are high, the Engage Series™ ranges in pixel pitch from 0.93mm to 2.5mm.

Built into a lightweight cabinet system in a 16:9 ratio, Engage Series™ displays make it easy to import and showcase all variants of 16:9 content. Engage Series™ displays can be installed and serviced from the front to minimize downtime and impact on infrastructure, and like all NanoLumens display solutions, they come backed by our industry-leading six-year warranty!

WHY NANOLUMENS®

At NanoLumens® we make dreams a reality through scalable LED display solutions for every size and purpose, both indoor and out. By combining the world's most powerful display platform with an unparalleled array of visual communication solutions, we give our clients an unprecedented ability to provide the most engaging customer experiences.

NIXEL™ TO PIXEL WARRANTY

While pixels may fail, we won't. Our industry-leading six year warranty backs your display all the way down to the individual LED—for six years. We're serious about our products, so we guarantee that we'll hold up our end of the bargain; that's simply how we do business.

BENEFITS

- **Narrow Pitch** - Engage Series™ displays range in pixel pitch from the classic 2.50mm down to the minute 0.93mm.
- **Versatile** - The slimmest of any NanoLumens display products, Engage Series™ displays embed seamlessly into nearly any environment and are installable and serviceable from the front.
- **Premium Resolution** - The 16:9-compatible subcomponents of the Engage Series allow you to show HD and 4K content without problematic reformatting issues while our innovative, ultra-fine-pitch displays provide you the best and brightest in LED image quality.
- **American Pride** - Engage Series™ displays are designed, assembled, and supported in the USA.
