(866) 469-7111

sales@knitec.com

- Remove paper backing and adhere provided gasket material to the two vertical baffles as shown below
- Gasket material must be in place before exterior grille is assembled to the wall sleeve

NOTE: *These gaskets will prevent air recirculation, premature failure of the compressor, and excessive overload cycling.*

ATTENTION INSTALLING PERSONNEL

As a professional installer you have an obligation to know the product better than the customer. This includes all safety precautions and related items.

Prior to actual installation, thoroughly familiarize yourself with this Instruction Manual. Pay special attention to all safety warnings. Often during installation or repair it is possible to place yourself in a position which is more hazardous than when the unit is in operation.

Remember, it is your responsibility to install the product safely and to know it well enough to be able to instruct a customer in its safe use.

Safety is a matter of common sense...a matter of thinking before acting. Most dealers have a list of specific good safety practices...follow them.

The precautions listed in this Installation Manual should not supersede existing practices but should be considered as supplemental information.
