

*Diana*<sup>®</sup>  
Phi

The new DIANA Phi headphone has world-class dynamics, resolution, and refinement to sound never before heard in such a compact package. As with any ABYSS, she's quite capable of playing any genre of music to an extreme level of enjoyment, limited only by the electronics and recording. The goosebump inducing 'you are there' sound is to die for.

'Bigger on the Inside' best describes her huge sound, bass depth and speed second only to her big brother, wide soundstage with impeccable tonal balance, voices so real you feel they are with you. Diana Phi plays her heart out for you every time you wear her.

We CNC machine and finish all aluminum frame components, produce our own planar speaker drivers, and skillfully assemble with US made stainless hardware, all within our own facility in Buffalo, New York, USA. The thinnest boutique headphone in the world sculpted from aircraft grade aluminum for incredible strength Sporty leathers and soft Alcantara<sup>®</sup>
