# New Vintage Spirit

*It all starts with having fun.  
These parts are for those who see life positively,  
and who love England and the British way of life.*

The British energy originates from that positive outlook. Laugh like everyone else, and have a passion for originality. The theme of this new vintage style - With Boys Racers Heart Directed by MOTO/POSH - lies in having fun one's self. It is the policy and passion of single-cylinder bike aficionados to enjoy the motorcycle, dress it up as a hobby, and make their machine look its best by adding major improvements to it. And the number of people with this outlook has been on the rise.

## POSH Catalyzer Mufflers

These are our mufflers for the SR400 equipped with catalytic converters. The SR400 traditionally has not required a catalytic converter. But we at POSH decided to add a catalytic converter for cleaner exhaust in light of current driving conditions, environmental issues, and the future environment concerning motorcycles. Sound is kept to the 94db regulated volume while keeping the thumping sound typical of single-cylinder engines. Power output is increased over stock mainly in the low- to mid-speed range, and maximum power even exceeds stock. This can be applied to all SR400 models including those the 1999 exhaust regulations apply to and BC-RH-01 to 1JR and 2H6 models. Certified by JMCA. Close-range exhaust volume is 94db.
