Introduction

Thank you for purchasing the TIBO Bond unit. We hope that your experience with the Bond will be enjoyable for many years to come. Your unit will be as good as the system it is connected to. The Bond is a wireless music receiver for streaming music that turns speakers, amplifiers and home theatre into a multi-play and multi-place digital music system. Bond supports audio streaming from smartphone, tablets and desktops. Please do not compromise on your amplifier and audio cabling. We recommend amplification from the TIBO range, which has been designed to ensure you get the highest sound quality for value of money. We also recommend you purchase excellent quality speaker cables to ensure your system reaches its full potential. The specialised iOS and Android app offers a simple yet great experience for your music streaming and multi-room set up.

The Spotify software is subject to third party licenses found here: <https://developer.spotify.com/esdk-third-party-licenses/>

Operation

1 – To activate the Bond, plug the Micro USB end of the charge cable into the Bond and the USB end into a power source. When activated, a blue light should light up on the front of the Bond.

2 – Open the TIBO app on your Android or Apple device. (See separate manual on setting up the TIBO app.)

3 – Once opened, if your TIBO app has no devices connected to it, the screen should look like this. (See right) Click on 'Add Device' at the bottom of the page.

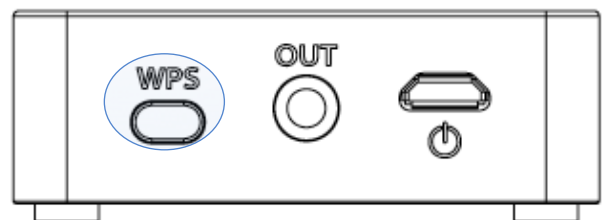

- Make sure your wireless device is **powered on**
- Make sure your wireless device is **on the same network** as your phone or tablet
- If no devices are found, tap the **Add Device** button below

Add Device

4 – The app should now be searching for devices. A message will appear prompting you to press the WPS button on the Bond, this is located on the rear of the unit. Press this to link the Bond with the Wi-fi.

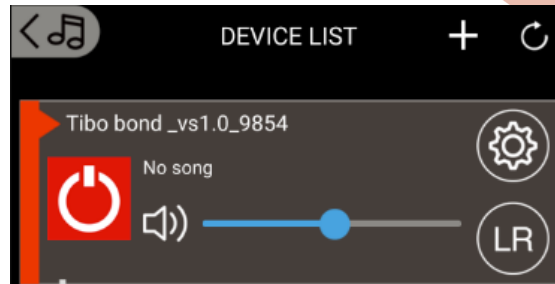

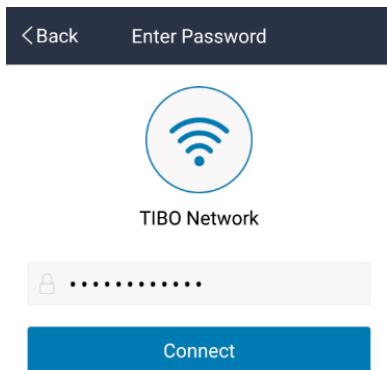

Press the WPS button to configure network

5 – After you have pressed the WPS button, click the ‘next’ button on the app, (located top right) type in your Wi-fi password and press connect. The Bond should now appear on your ‘Device List’ within the TIBO app. (See right)

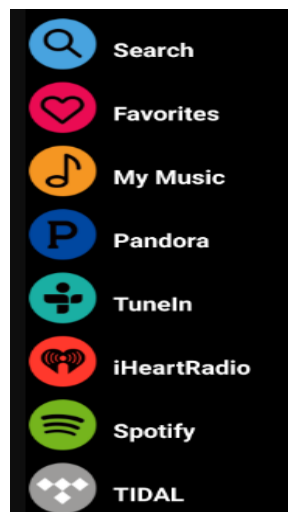

6 – Connect one end of the 3.5mm cable to the Bond line out. Then connect the other end of the cable to any stereo Hi-fi system that you desire that includes a 3.5mm line in input.

If your Hi-fi system only has a 6.3mm input, you will need to purchase a separate adapter to connect the 3.5mm input.

7 – You should now be able to play music via the TIBO app through your Hi-fi system. Click the music icon in the top left corner of the ‘Device List.’ You can play music from your source, TuneIn radio, Spotify etc.

info@tibo-audio.com

8 – The ‘Device List’ page in the TIBO app displays every TIBO smart product that is connected to the Wi-fi. To connect other TIBO smart products with your Wi-fi, follow the same procedure of steps 2-6.

9 – In order to play music through additional TIBO smart products at the same time as your own Hi-fi system, simply group the TIBO smart audio products in the app to the Bond. You can do this by clicking and dragging the other smart audio products on top of the Bond unit in the app. Your ‘Device List’ page should now look something like this. (See right)

Troubleshooting

Problem	Possible Cause
No power	- The Micro USB charge cable is not connected properly.
No sound	- The speakers are disconnected. - Volume control is at lowest level. - The 3.5mm jack is not inserted properly.
Suddenly no sound during operation	- Speakers may have been disconnected from Wi-fi - The product may have entered overheat protection mode. - Charge cable or 3.5mm jack disconnected
Bad sound/Sound distorted	- Audio source problem. - Bad or incorrect speaker connections.
Product dropping in and out of Wi-fi	- Wi-fi speed - Product too far away from router
Cannot connect to router	- Ensure router is dual band, as TIBO products only connect with 2.4GHz and NOT 5GHz
