

Anatomy of a RYP Wear Skirt - from the inside out!

Fit • Function • Fashion

Skirt fabric comes in unique, often seasonal, colors and patterns. It's lightweight polyester-spandex blend offers maximum comfort and durability: it stretches, wicks moisture and is quick drying.

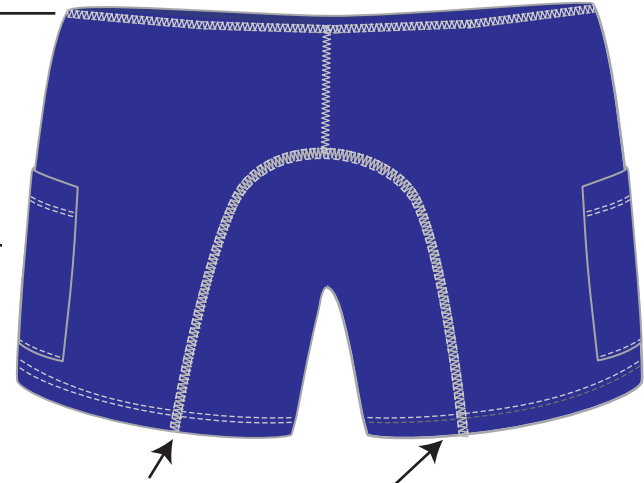

UNDER SHORT FRONT

Waistband is securely attached to the under short with flatlock stitching.

side storage pocket on both sides

UNDER SHORT BACK

RYP Wear's signature gusset design with flatlock stitching is on both the front and the back of the under short. It replaces a center seam, so sensitive areas are avoided and both chafing and riding up are minimized.

SKIRT FRONT

wide, 2-layer, comfortable waist band; the inside layer is double flat-stitched below the fold.

Hemmed side slits offer additional mobility

SKIRT BACK
