Description

Our TradeStrip120 features 120 LEDs per metre, making it ideal for use when minimal spotting is required. Mounted in an aluminium profile it produces a fully diffused, smooth appearance and a bright light output.

TradeStrip120 is our most popular LED strip light for smaller lighting applications where it's balance of price and performance makes a winning combination.

Don't think that the low price means low quality - this is made on one of the most advanced production lines in the world featuring a single, continuous, 50m long PCB which is assembled automatically to keep costs down and increase reliability.

Ideal for use under cabinets and plinths in kitchens, inside wardrobes, garages, bedrooms or any other indoor application.

Easy to cut and use - it can be soldered or use our solder free GRIPPA connectors

This product is fully dimmable with the correct power supply and has a 2 Year Warranty against failure.
