

With Retroflex™, we've gone back to the basics. Retroflex™ is our premium dyed line of window film that is manufactured on a tried-and-true dyed window film chassis. Retroflex™ has a beautiful black sheen that will instantly make any vehicle pop with style and will easily match factory tint.

Retroflex™ is our premium dyed line of window film and is the most economical type of window film we offer. It blocks light rays by the addition of dye to the film. Solar heat is absorbed by the dye in the film, thus preventing some of the heat from entering through the window. Retroflex™ blocks up to 99.9% of the sun's UV rays through the dyed layer of polyester within the film.

- 1. HARD COAT
- 2. DYED POLYESTER LAYER
- 3. LAMINATE ADHESIVE
- 4. CLEAR POLYESTER LAYER
- 5. MOUNTING ADHESIVE
- 6. GLASS
