

**FW Ink is an acrylic-based, pigmented, water-resistant ink with a high degree of lightfastness and intermixability.**

FW Ink can be used straight out of the dropper, or diluted to achieve the most subtle of tones, very similar in character to watercolour. Such washes will dry to a water-resistant film on virtually all surfaces\* and successive layers of colour can be laid over.

FW inks can be applied using traditional brushes, but also work well through airbrushes, technical pens, and paint markers making them ideal for producing technical illustrations and finely worked drawings. The expressive fluidity of acrylic inks is suitable for use by fine artists, illustrators, graphic designers, calligraphers, decorative artists and hobbyists.

**FW Ink 29.5ml**

- 45 colours
- Glass bottle with dropper lid
- Dimensions: 7.6 x 4.4 x 4.4cm

**FW Ink 180ml**

- 15 colours
- Plastic bottle with dispensing lid
- Dimensions: 16 x 5.8 x 3.5cm

**TRANSPARENCY**

- Opaque
- ▨ Semi Opaque
- Transparent

**LIGHT FASTNESS**

- \*\*\*\* Permanent
- \*\*\* Normally Permanent
- \*\* Moderately Permanent
- \* Fugitive

**FW Pearlescent Inks can be used to add shimmer and shine to decorative arts such as greeting cards, seasonal decorations, mounts and frames.**

They are perfect to create dazzling effect where highly decorative elements are required to illuminate different forms, and can be used on various surfaces as well as conventional surfaces. These intermixable acrylic-based inks are water-soluble when wet, but dry to a water-resistant film on most surfaces\*. All colours are very to extremely lightfast.

Because of the large particle size of pearlescent pigments, they will not go through fine line nozzles for airbrushes, nor will they be suitable for technical pens, fountain pens and paint markers\*\*. The best means of applying pearlescent colours is by using a dipper pen, ruling pen or brush.
