

Georgian Oil colours are traditionally crafted, triple-milled colours made from a generous loading of high quality pigments.

These rich, low-odour colours can be used directly from the tube with brush or knife, or thinned to create the finest of glazes. Georgian oils offer a reliable, quick and even drying time across the range, and are surface dry in 4 to 5 days depending on the colour. The Georgian Oil range includes 4 genuine cadmium and cobalt colours within the single price point, as well as hues for these colours for those who would rather use alternatives. Suitable for professional and amateur artists alike.

Georgian Oil, along with Georgian Water Mixable Oil, mediums, brushes, pads, and artboards offer artists of all levels of expertise a complete oil suite of perfectly compatible products.
