Insurance Coverage

FOR BREAST CARE PRODUCTS

Most major private insurance companies and Medicare cover these products. However, the amount is dependent on the region as defined by Medicare. Post-surgical camisoles for most cancer diagnoses are normally covered under Medicare code L8015.

YOUR BREAST CARE SPECIALIST CAN HELP YOU:

- determine the appropriate style and size of camisole or bra to meet your needs
- find local support group contact information
- complete and file paperwork for reimbursement from insurance and Medicare
- choose a breast prosthesis and bra that is best for you after your surgery

PREPARING FOR Breast Surgery

Your guide to post-surgical camisoles and bras.

Diagnosis

THROUGH RECOVERY

ONCE DIAGNOSED...

You and your doctor will want to prepare for your surgery and recovery. Your recovery will be easier if you have a special post-surgical camisole or bra in advance. Such a garment can help alleviate both your physical and emotional discomfort.

DURING RECOVERY...

While drains are in place, it can be challenging to find workable clothing solutions. You may feel well enough to leave the house and resume aspects of your normal life. Having a camisole that can secure your drains will make it easier to move around.

Post-Surgical

CAMISOLES AND BRAS

A post-surgical garment provides support and comfort for you immediately after surgery and throughout your recovery.

We offer a number of post-surgical camisole and bra styles. Camisoles and bras by Wear Ease are uniquely designed with an inner shelf bra to support the breast(s).

All Wear Ease post-surgical styles include removable drain tube pouches and adjustable fiberfill breast forms (puffs). The puff(s) fit securely into built-in pockets and provide breast shape without discomfort.
