1 September 2016

**Statement of suitability**

Please be advised that the Wire Industrial & Marine BMST-4050 swage tool is machined & assembled in Australia by Dolphin Marine from imported components.

The jaws are made of high carbon cast steel & are hardened to 42 Rockwell. The hardening and chemical blackening process is completed by R J Heat Treatment at Moorebank in Western Sydney.

The machining & assembly is completed by Dolphin Marine in Brookvale, Sydney.

The small hole in the tool is used for 4mm swages & the large hole for 4.8mm swages. The adjusting screw on the top of the jaws allows for adjustment to keep the jaws within tolerance for complete & proper swaging. The tools can press copper & alloy swages only & are not able to press stainless steel ferrules & or terminal fittings.

Each tool :-

- Weighs 5.5kg
- 520mm long

**N.B. Hand swaging is NOT suitable for any application where personal safety is a consideration!**
