Statement of suitability

Please be advised that the Wire Industrial & Marine HST-4080 swage tool is machined & assembled in Australia by Dolphin Marine from imported components.

The jaws are made of high carbon cast steel & are hardened to 42 Rockwell. The hardening and chemical blackening process is completed by R J Heat Treatment at Moorebank in Western Sydney.

The machining & assembly is completed by Dolphin Marine near Brookvale in Sydney.

The small hole in the tool is used for 4mm rope swages, middle hole for 6mm rope swages & the 3rd large hole for 8mm copper rope swages. The adjusting screw on the side near the jaws allows for adjustment to keep the jaws within tolerance for complete & proper swaging. The tools can press copper & alloy swages only & are not able to press stainless steel ferrules & or terminal fittings.

Each tool :-

- Weighs 2.5kg
- 620mm long
- 140mm wide at the handles

N.B. Hand swaging is NOT suitable for any application where personal safety is a consideration!

Picture attached next page.

If you have any further queries please don't hesitate to contact us on the above phone or email.

Yours faithfully

Wire Industrial & Marine
