1 September 2016

**Statement of suitability**

Please be advised that the Wire Industrial & Marine HST-1000 swage tool is machined & assembled in Australia by Dolphin Marine from imported components.

The jaws are made of high carbon cast steel & are hardened to 42 Rockwell. The hardening and chemical blackening process is completed by R J Heat Treatment at Moorebank in Western Sydney.

The machining & assembly is completed by Dolphin Marine near Brookvale in Sydney.

The hole in the tool is only used for 10mm rope swages. The adjusting screw on the side near the jaws allows for adjustment to keep the jaws within tolerance for complete & proper swaging. The tools can press copper & alloy swages only & are not able to press stainless steel ferrules & or terminal fittings.

Each tool :-

- Weighs 2.5kg
- 620mm long
- 140mm wide at the handles

**N.B. Hand swaging is NOT suitable for any application where personal safety is a consideration!**

Picture attached next page.

If you have any further queries please don't hesitate to contact us on the above phone or email.

Yours faithfully

Wire Industrial & Marine
