Statement of suitability

Please be advised that the Wire Industrial & Marine BMST-1200 swage tool is machined & assembled in Australia by Dolphin Marine from imported components.

The jaws are made of high carbon cast steel & are hardened to 42 Rockwell. The hardening and chemical blackening process is completed by R J Heat Treatment at Moorebank in Western Sydney.

The machining & assembly is completed by Dolphin Marine near Brookvale in Sydney.

The hole in the tool is only used for 12mm rope swages. The adjusting screw on the top of the jaws allows for adjustment to keep the jaws within tolerance for complete & proper swaging. The tools can press copper & alloy swages only & are not able to press stainless steel ferrules & or terminal fittings.

Each tool :-

- Weighs 5.5kg
- 520mm long

N.B. Hand swaging is NOT suitable for any application where personal safety is a consideration!

Pictures attached next page.

If you have any further queries please don't hesitate to contact us on the above phone or email.

Yours faithfully

Wire Industrial & Marine
