

# CERBERUS Deadlift Bar

## Description

Tried & Tested at the Official Strongman Games 2019

We have spent years developing the Cerberus Deadlift Bar. Our first prototype was tested in 2017 and the first public sneak-peak of the bar was January 2019. Our final testing culminated in the Deadlift Medley event at the Official Strongman Games 2019.

This is unlike any other Deadlift Bar on the market right now.

This is an extremely durable bar with Bronze Bushes, Zinc Shaft and Sleeves and comes with our Cerberus Strength 3 Year Functional Warranty\*. At 2.4m long with a massive 460mm loadable sleeve length this bar is made for BIG weight! With larger collars, extra length and a 27mm shaft this bar has great flex (whip). With aggressive knurl, powerlifting

markings and no centre knurl this is THE perfect bar for Deadlifting. Made to meet the specs of specialised bar rules for ALL federations. All Cerberus Strength barbells come with our 3 Year Functional Warranty\* as standard.
