

Description

The Bench Fitness Climbing Rope, measuring 4.5m in length with a 38mm diameter, is crafted from durable polyhemp. At one end, it features a powder-coated steel attachment, ensuring easy and secure fastening to rigs, beams, or crossmembers.

As with all climbing ropes, this product is subject to wear and tear. It's essential to inspect the rope before and after every use. If any signs of damage are detected, immediate replacement is advised.
