

Composite Rubber Tile

500mm x 500mm x 25mm

Description

The 500mm x 500mm x 25mm composite rubber tile is a top-quality flooring solution for indoor athletic facilities and gyms. Its combination of a high-quality recycled rubber base layer and a durable black with white speck EPDM top creates a strong and long-lasting surface that can withstand heavy use. The tile's 500mm x 500mm dimensions and 25mm thickness make it easy to install and provide a stable base for various activities.

This tile is equipped with a non-slip surface that is easy to clean, ensuring a safe and hygienic environment for all users. In addition, the tile is non-toxic and has no odor, making it a safe option for indoor athletic facilities and gyms. If you're looking for more color options, they are available, though manufacturing times may vary. For added stability, plastic connectors are available separately to prevent movement of the tiles without the need for gluing.

Tile connector sold separately.

Features

- 25mm thickness
- Non Slip easy to clean EPDM surface
