

EXCEED Chest Supported Row

Description

Transform your back workouts with the Bench Fitness EXCEED Chest Supported row, featuring free-motion handles with adjustable width and a fully height-adjustable footplate. The sturdy and versatile EXCEED Chest Supported Row provides a comfortable and effective workout for your entire back, targeting both upper and lower muscle groups. With adjustable handles, footplate and huge plate loading ability, you can customize your workout to fit your body and push your limits. Say goodbye to back pain and hello to back gains with the Bench Fitness EXCEED Chest Supported row- your back will thank you!

At Bench Fitness we are all about exceeding expectations and that has never been more true than our Exceed Plate loaded machines. Fully customisable with a huge selection of colours and the option to personalise even further by adding your own branding. All Exceed plate loaded machines are also compatible with our REVOLVE band pegs to take workouts to the next level.
