

Loadable DB Handles

Description

Dumbbells are an essential weapon in any gym's arsenal, but with the amount of space a large variety of dumbbells take, it's not always a convenient addition to smaller gyms. The Bench Fitness Loadable DB Handles are the ideal solution to this problem. Weighing in at 7kg each and measuring only 520mm in length, the Bench Fitness Loadable DB Handles are a very convenient and portable solution. With a 35mm diameter knurled handle the Loadable DB Handles are comfortable to hold and easy to grip. With the 170mm long loadable sleeves the Bench Fitness Loadable DB Handles are big enough to fit a large amount of plates.

Built Strong as only Bench Fitness can, the Bench Fitness Loadable DB Handles will take whatever you can throw at it for years to come.

Finish on the coated sleeves may experience wear over time due to any contact with metal, such as when plates are added or removed.

Features

- Solid 35mm handles
- Fixed 50mm solid steel sleeves
- Aggressive knurl
- Matt black powder coat
