

REVOLVE Jammer Arms

Description

Rigs and power racks are an essential tool for any gym, but they do still have their limitations when it comes to isolating certain muscles and movements. With the Bench Fitness Revolve Jammer Arms these limitations are all but removed. Easily fitted on to any of our Revolve Rigs or Racks, the Bench Fitness Revolve Jammer arms have fully height adjustable grips to ensure you can hit all the angles you need. With grips designed to offer multiple grip angles, the Revolve Jammer Arms are an exceptional tool in taking your training to the next level and also act as a phenomenal rehabilitation tool by allowing very fine adjustments in movement patterns. Built Strong as only Bench Fitness can, the Revolve range offers fully customizable colours and branding upon enquiry.
