PACK LIKE A PRO

GET THE MOST OUT OF YOUR CHILLY ICE BOX

PRE-CHILL BEFORE PACKING

Pre-chill the cooler with ice packs or crushed ice at least 1 hour before packing. Also, make sure food and drinks are frozen or cold before going into the cooler.

USE SOLID ICE CUBES AND ICE PACKS

Cubed ice is better for keeping food colder for longer. You can fit more of it into available space. More cold ice equals less warm air. Pack in as much as possible - right to the top! Re-freezable ice packs, such as the Chilly Ice Pack, are great to pack directly beside perishables such as frozen meat or dairy.

FOOD FIRST, ICE LAST

Cold air travels downwards. Load your cold drinks and food first, then fill to the top with cubed ice. This displaces the warmer air and will give you maximum ice retention.

KEEP OUT OF THE SUN

Be aware that inside a vehicle can get significantly hotter than the outside temperature. Where possible, store your cooler outdoors and out of the sun.

KEEP THE LID CLOSED

Only go into it for what you need, then shut and latch the lid immediately so you're not unnecessarily venting cool, beneficial air. Consider a separate cooler for frequently accessed items, like drinks.

COOLER CARE

Clean your cooler using mild soap and warm water. Air-dry thoroughly with the lid open before storing to avoid mold and mildew.
