

Apparel Care

How to wash:

First washing : Put $\frac{3}{4}$ cup of white vinegar in cold water, while machine is filling.

To avoid color degradation and material shrinking, your new Ouragan suit ***MUST be washed turned inside out with non-phosphorus detergent in cold water.*** Detergents for babies are usually non-phosphorus detergents.

Drying :

Hang to dry or Dry Clean.

Important: Do not use dryers.

Color fastness:

All fabrics are subject to color fastness. In order to slow down the process, try to limit sun exposure. ***A jumpsuit shouldn't be worn as day to day clothing.***

Limiting its use to skydiving and storing it in the delivery bag during extended non-jumping periods will slow down color fastness.
