

## Coco Coir Grow Blocks for Rubus

- Fresh water rinsed, aged and sieved fractions of coco with low EC
- Blended with coco pith, fiber and chips to ensure optimum moisture and air porosity
- Layered construction with coco chips at the bottom for particle free drainage
- Ideal for high density planting within water and nutrient recapture systems
- **OMRI listed** for organic use, fully biodegradable and compostable substrate
- Blocks are easy to store and transport in high volume thus reducing costs
- Thousands of blocks can be easily expanded at once with irrigation emitters
- All aspects of the Rubus grow blocks can be further customized to meet individual grower requirements

### Directions of Use

1. Place the block inside the Bato or Plantlogic plastic pots, rough side down
2. Securely place irrigation emitters through the pre-drilled holes on blocks
3. Turn water on until block is fully expanded

\*Optional pre-drilled planting hole (hole dimensions based on requirements)
