Sigris brand housings and curbs are manufactured in the United States using .125" thick aluminum.

We use computer guided laser cutters and metal forming machines. The seams and joints are all hand welded to insure a weather-tight housing and lid.

Sigris Pipe Chase Housings are finished using a UV inhibited powder coating material that is electrostatically bonded creating a uniform .2mil thick finish.

**Sigris Exit Seal®**

**Our flawless track record...** Our first Pipe Chase Housing was patented in 2006, since then we have sold and shipped over 2,000 Pipe Chase Housings and Curbs of various sizes and... about 20,000 Sigris Exit Seals® without a single failure or warranty request. There is no better way to pass conduit, pipe and lines through the roof than with Sigris Pipe Chase Housings, Curbs and Sigris Exit Seals®.

**Sigris Exit Seal®** - the “no caulk” exit seal - Molded to Schedule 80 strength using high impact resistant ABS resin. EPDM gaskets are used for the cap and exterior seals. Backed by a limited lifetime warranty.

Manufactured and assembled in the USA
