

# Sigrist Exit Seal®

By ALTA Products, LLC

Approaching 50,000 installed on commercial roofs from coast to coast

*Won't rust or oxidize or conduct cold and heat like metal seals do*

*Lifetime Limited Warranty*

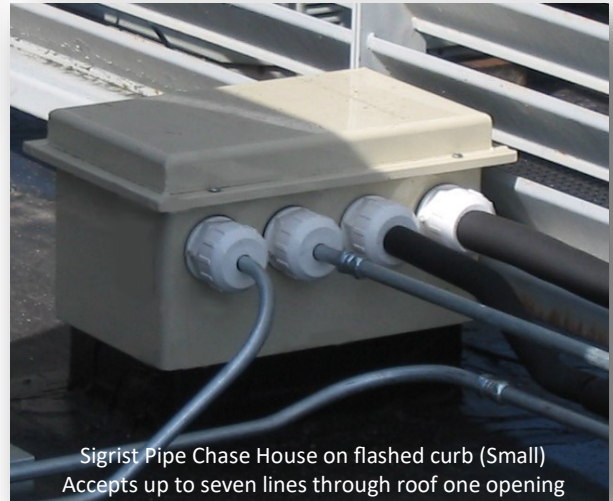

X-Long

Regular

- **Two Lengths - Standard fits walls up to .75" thick, X-Long for walls up to 8.5" thick**
- Create a weather-tight pipe/line seal for roof and 8.5" wall penetrations
- Injection molded using our proprietary resins with UV inhibitor
- Durable and long lasting EPDM rubber gaskets
- 11 common pathway sizes (1/4" to 1 5/8" OD)

Sigrist Exit Seal®

Sigrist Pipe Chase House on flashed curb (Small)  
Accepts up to seven lines through roof one opening

Molded from high impact resin  
with UV inhibitor

Image to the right shows a roof-top installation using 4 Sigrist Exit Seals® on our "Small" Sigrist Pipe Chase Housing and Curb system.

Sigrist Exit Seals® are used to create a weather-tight pathway through vertical walls with a smooth exterior. Galvanized or painted

Maximum installable wall thicknesses: Standard= 3/4" & XL = 8.5" walls

*Our Exit Seals work just as well on your doghouses as they do on ours.*

*We steadfastly manufacture all of our ALTA products in the USA*

## **Material Properties and Temperature Ranges**

Tensile strength	6,600 PSI
Flexural strength	10,800 PSI
Exit Seal components	-22F to +176F/185F
EPDM Gaskets:	-20F to +350F

Even at -22F our seals still have an impact resistance of 4.3Ft/Lbs In.  
The 185F high range represents no deformation of material in continual-service air temperature.

Specifications may change without notice as we constantly work to increase performance ranges.
