- LED light ONLY works when environment is dark

- LED light ONLY works when motion sensor is activated by movement

(1) LED Light [H] (1) Double-sided tape [I]

Features:

- 1. Can be taped and applied without screws.
- Light will turn on automatically when passing by and turn off after leaving.
- 3. If the light sensor detects enough lights, then it will not turn on even if there is movement of human body.

Specifications:

1.Work voltage: DC3-6V

2. Static features: 50uA

3. Induction distance: 3-5m

4. Induction angle: <110

5. Delay time: 15s

6. Power by: 4 *AAA battery

7. Warm light
