

BRACELET SIZING GUIDE

Print this sheet to use as a guideline when selecting sizing for Ion Collection bracelets.

For the most accurate measurement, ensure the Page Scaling option is set to "none" in the print dialog box of your printer preferences. The Sizing Guide must be printed on a full 8.5" x 11" (letter size) page.

To ensure the Sizing Guide has been printed properly for an accurate measurement, use a ruler to measure the ruler below. Each increment should measure exactly 1 inch.

*Please note: Our bracelets are both flexible and durable and can be gently shaped to fit the wrist by applying light pressure on either end.
The Ion Collection Sizing Guide is an indicative guide only and therefore may not be an exact measure.*

HOW TO USE

1

Print and cut out the paper Sizing Guide below.

2

Wrap the strip around your wrist until it fits comfortably (not too snug, not too loose) as a bracelet would.

3

Mark the point where the paper meets itself. Take note of the size.
