

MIRROR INSTALLATION INSTRUCTIONS

- Carefully remove and check that the mirror is undamaged;
- Check to ensure you have received all the package contents:
 - 2 x Metal hanging cleats (already installed on the backside of the mirror);
 - 2 x Round hanging wall cleats (must be installed on the wall);
 - 2 x Wall anchors;
 - 2 x Screws 4.0 x 45;
- Determine at what height the wall cleats are to be hung. Mark with pencil;
- Using a level make a horizontal line where the mirror is to be hung that is parallel to the floor;
- Place the included round cleats on this line in the desired location and mark for the holes;
- Bore holes for the wall anchors and install wall anchors;
- Attach the wall cleats to the wall by passing screws through the cleats and into the wall anchors;
- Raise mirror above wall cleat and lower into position so that the cleats that is installed by the factory contacts the wall cleats previously mounted on the wall. Carefully lower into position;
- Push down on the top of the mirror to ensure the mirror cleats and the wall cleats are fully seated into position;
- The mirror should be fully against the wall when cleats are fully seated;
- Slight side to side adjustments can be made by lifting up slightly on the mirror and sliding the mirror left and right;
