

BLOOD WORM

TIED BY: Lorie Hagen

This is a very productive fly when fished on the bottom. Fish cannot resist

MATERIALS NEEDED:

HOOK | 270 Natural Bend | Size 14-22
BODY | Body Material | Blood Red
THREAD | Flymaster Plus | White
HEAD CEMENT | Soft Body | Thin
 Vegetable Oil

The material used to recreate this can be found at: www.unexcelledfishing.com

« Step 1

Start with your thread on the hook. You only need to go a hook gap length back from the eye.

« Step 2

Cut a 6 to 8" piece of Body Material and fill with oil. Tie a not in both ends. Tie in your body material directly in front of one of the knots, a hook gap length from the eye. After you have your Body Material tied in, lay it along the hook shaft and pull tight. Wrap your thread along the Body Material then back up to the point where you tied it in. Cut off that knot and place a couple more wraps over the body material and then do a half hitch to hold in the oil.

« Step 3

Make sure the remaining Body Material is full of oil. It not, hold in your left hand and use your right to push the oil up the Body Material. Use your forceps to clamp the Body Material. Now you can wrap the Body Material around the hook. Lay each wrap next to the last, but not overlapping. Tie off at your tie in location and cut off your extra Body Material. Place a couple more wraps and a half hitch.

« Step 4

Now you can build a tapered head with your thread and whip finish. Take your read marker and make the head red. Apply Soft Body and go fishing.

GET READY FOR *new* PRODUCTS IN JANUARY

We will have lots of new products ready for you in January 2013. Some of them include:

- » ESTAZ
- » BRAID
- » FLASH
- » ZONKERS
- » DEER AND ELK HAIR
- » NEW LEGZ COLORS
- » AND A LOT MORE. . .
