

POLY WING SPINNER

TIED BY: Lorie Hagen

A poly spinner is a mayfly in it's final reproductive stage. Often during a hatch, trout become very selective to feeding on the spent or expired spinners floating helplessly on the water. The body color of this fly can be changed to match almost any mayfly spinner. The poly bear wings give this fly good floatation. You can use it for wings on other spinner patterns as well. You can also use poly bear for the body as well.

MATERIALS NEEDED:

- HOOK | 305 Dry Fly | Sz 12-20
- THREAD | UNI | Olive | 6/0 or 8/0
- BODY | Mohair Plus | Light Olive
- TAIL | Pheasant Tail
- WING | Poly Bear | White or Cream
- VICE | Hagen's Deluxe Stainless Steel Vice
- BOBBIN | Rite Bobbin | Half Hitch Mag

The material used to recreate this can be found at: www.unexcelledfishing.com

« Step 1

Position your thread at the tailing point. Tying in 4-6 pheasant tail barbs. They should be the same length as the hook shank.

« Step 2

Place your Mohair Dubbing onto your thread and and dub 2/3's of the hook shank.

« Step 3

Cut a piece of poly bear for the wings. Mount in front of the dubbing. Use a dubbed crisscross to the wing mounting thread and in front of the wings. Tie off and whip finish. Trim wings to the same length as the hook shank. The wings should project outward, perpendicular to the shank.
