

Ring Size Guide

SUNSHINE JEWELRY INC. 702 Washington Ave. Philadelphia, PA 19147 P: 215-271-2950

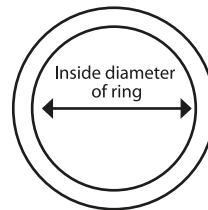

If the height of a credit card (54mm) fits inside this outline, your print scale is correct

How to use the ring sizer:

1. Before printing this page set your Page Scaling to “None” in Print Settings and the page scaling is set to 100%.
2. Place an existing ring over the circles above and match the inside of the ring to the nearest circle.
Keep in mind that the diameter(mm) refers to the inner diameter of the ring.
3. If you fall between two sizes, select the larger size.
4. This ring sizer is used as a reference, for more accurate sizing, visit our retail shop for a complimentary ring sizing.

Things to consider:

Keep in mind that your ring size will change based on the width of the band. The wider the band, the tighter the ring will feel and you may need to increase it by a quarter or half a size.

Tip: When measuring your ring, make sure your finger is at normal body temperature. Your finger will shrink in cold temperatures and expand in hot temperatures.

If you have any questions, you can reach us at sales@sunshinejewelryinc.com and our sales associates will be happy to assist.
