LISHI PICK/DECODERS

2-IN-1 PICK/DECODER TOOLS

The most innovative tool for picking and decoding locks, it even works with a lock with spool pins. Decode the lock while you pick the lock. That means that you don't have to take it apart to make a new key for it. Just write down the code as you are picking and then use your code machine or your depth and spacing keys and a standard duplicator to make a key to fit. Each tool corresponds to a particular keyway used by various lock manufacturers. "L" Models have the grid and pick mounted to the opposite side for locks that can only be accessed from the opposite side.
