

Welding Protection Products

Phillips Safety Products, Inc.

Phillips Safety is a leading United States manufacturer of **specialty safety eyewear, shielding and barriers.**

Through our network of distributors we provide top quality **protective welding equipment** to many of the largest companies in the world.

Our welding protection line is available in welder **shades 4 – 14** for the majority of our lens offerings. All welding shades **meet or exceed DIN standards.**

Our Torch & Brazing eye wear comes in **glass and polycarbonate Plano non-prescription lenses** with styles for the average person and larger sizes. Our Quartz Working Split Lens Safety Glasses have Plano, non-prescription glass lenses.

We offer standard sizes and custom cutting of **green welding sheet glass** in shades 8, 9, 10, 11, 12 and 14. Lighter shades available upon request. As well as standard sizes and custom cutting of **green polycarbonate welding sheets** in shades 3, 5, 6, 8 and 10.

Welding Product Information

30 Day Return Policy

Stocking items not customized may be returned in original condition with all accessories within 30 days of receipt for a full refund.

Cleaning of Lenses

Remove any dirt or abrasives with clear water, use a mild non-alkali/acidic soap/detergent and soft lint free cloth. Do not use ammonia or Windex.

Storage

Lenses should be stored in protective case when not in use.

Care & Maintenance

Examine lenses frequently. If lenses become pitted, chipped or in other ways damaged cease use immediately and contact your distributor for instructions.

Super Blue Drop In Filter

Our Super Blue Drop-In filter is a blue polycarbonate lens that blocks the yellow/orange line of the visible spectrum (589-600nm) and is designed to be **used with your standard green welding lens** and adds about ½ of a shade. This filter improves your clarity of vision by greatly reducing the brightness of the arc and eliminating yellow flare.

- Dimensions; 2 x 4.25
- Color; Blue
- Material; Polycarbonate

Size – in inches	MSRP	Part#
2 x 4.25	\$ 49.99	WLD-SFP-WFS

Super Magenta Drop In Filter

Our Super Magenta Drop-In filter is a magenta polycarbonate lens that provides greater flare reduction while enhancing the color and visual clarity of your work. This lens needs to be used along **with your standard green welding lens** and adds about ½ of a shade. . This advanced material erases the yellow and orange colors of the spectrum while enhancing the other colors. The resulting view is outstanding.

AlloWeld Small Emerald Lenses

Phillips Safety AlloWeld aluminum glass welding lenses are used for **welding and brazing aluminum, cast iron and stainless steel**. These lenses **eliminate all sodium flare** while welding and brazing and are excellent for working on air crafts, race cars, boats, radiators, and refrigeration units. The rare Earth elements found in AlloWeld **increase color contrast** so you can better determine puddling and temperature of the material you are working with. AlloWeld is made from high-quality, distortion-free German glass which offers excellent scratch resistance and durability. AlloWeld meets the same ANSI welding lens standards, the lens color is a **dark emerald green**.

AlloWeld Gold Lenses

Phillips Safety's breakthrough AlloWeld Gold Coated Welding Lens combines the infrared and ultraviolet protection of a standard gold coated glass lens with a special flare reducing filter made of rare earth elementals. The gold mirror reflects away the heat of the IR and thereby keeps your eyes cooler for your whole shift. Made in the USA with glass imported from Germany, they improve your vision by erasing the harsh yellow flare from welding procedures. The AlloWeld virtually eliminates the arc during welding; allowing you to see your stick, your work and the puddle as if there is no flare at all. If your welds are X-Rayed, you need to be using an Alloweld. The Alloweld runs just slightly darker than a standard shade,

- Dimensions; 2 x 4.25
