

Warrior Cover installation

Instructions:

First, take the cover out of the box and lay the black side on the ground. Fold the cover back halfway. Grab the cover with two people, pull nice and tight, raise it up as you drag it over the pool. When you get it on halfway, unfold the rest of it over the pool. Get the cover centered over the pool. Take the cable and thread it through the grommet holes around the cover. The cover should be hanging down about two feet all the way around the cover. Thread the cable into the winch and pull it nice and tight. Now ratchet the cable until it is snug around the pool.
