ÆLITE™ Aesthetic Enamel

Reinforced Nanofil Composite

AELITE Aesthetic Enamel is a light-cured, highly reinforced, nanofil composite with a complete range of VITA® shades as well as three incisal shades. AELITE Aesthetic Enamel has high strength and can be placed as the enamel layer in both posterior and anterior restorations. AELITE Aesthetic Enamel has excellent polishability due to the nano-sized filler particles, making it suitable for anterior restorations. The reinforcing filler gives AELITE Aesthetic Enamel maximum strength and durability not typically seen in a nanofil composite.

ÆLITE™ All-Purpose Body

Universal Hybrid Composite

AELITE All-Purpose Body is a durable, light-cured, universal microhybrid composite suitable for all applications from Class I through Class V. AELITE All-Purpose Body can be used as part of a layering technique or stand-alone, as a universal restorative; features a complete line of body shades and two (2) opaque shades.

ÆLITE™ LS Posterior

Low Shrinkage Hybrid Composite

AELITE LS Posterior is a light-cured, highly filled, low shrinkage posterior composite. Due to the high filler content, this composite simplifies establishment of occlusal contours, proximal surfaces and interproximal contacts.
