# **5 REASONS TO TRY ALL-BOND Light-Cured Dental Adhesive**

## **Compatible**

Compatible with all light-, self-, and dual-cured resin composite and cement materials for all direct and indirect procedures.

### Versatile

Its chemistry offers the flexibility to either total-, self-, or selective-etch.

### **Durable**

Unique chemistry allows for the adhesive layer to become hydrophobic after polymerization, which enhances durability over time.

### Convenient

No separate activator bottle is required.

#### **Peace-of-Mind**

Low film thickness (less than 10 microns) ensures proper fit of indirect restorations.
