

Composite Instruments Nonstick titanium-nitride coated

Our multi-function instruments have double condenser configurations and carving blades on opposite ends. Now you can place, pack, shape and carve your way to perfectly contoured composite restorations without ever having to switch instruments!

TN008 "Skippy Special"

TN009 5-in-1

Most Popular!

Item	Description
TN008	"Skippy Special" 2 condensers, ball burnisher, blade, acorn
TN009	5-in-1 Multi-Function 2 blades, 2 condensers, acorn

- Large-diameter, lightweight handles for improved ergonomics.
- Provides non-stick surface for placement and shaping of composites.
- 40% smoother than stainless steel for a non-porous, non-stick surface.
- Withstands diverse cleaning/sterilization methods, including ultrasonic cleaning.

TN006

Item	Description
TN001	Medium Blades Placement of composite material Gingival retraction to sculpt under free margins Burnishing matrix bands
TN002	Medium Blade with Medium Plugger Contouring small Class I, II, V Packing composite material into conservative preparations Burnishing matrix bands
TN003	Medium Blade with Large Plugger Contouring large Class I, II, V Packing composite material into large preparations Convex plugger tip minimizes pullback of composite material
TN004	Extra Thin Blades Reach under margins to hone and sculpt Sculpting interproximally Packing cord in gingival crevice
TN005	Long Extra Thin Blades Allows additional access for hard-to-reach posterior contouring and shaping Sculpting interproximally Packing cord in gingival crevice
TN006	Small/Medium Multi-Function Plugger Placement of composite material in smaller Class II and III Packing material toward gingival seats Carving occlusal anatomy with acorn carver

Composi-Tight® 3D Fusion™

Composi-Tight® 3D Fusion™ System includes dentistry's premier heavy-duty stainless steel ring placement forceps. Regardless of your hand size or strength, Composi-Tight® 3D Fusion™ forceps will give you incredible control for the precise placement of super-strong separator rings over even the widest molars.

Composi-Tight® 3D Fusion™ forceps will work with virtually any ring from any manufacturer.

Ring Placement Forceps**
FXP01

Composi-Tight® Matrix Forceps

Precise Placement, Unbeatable Grip.

Precise Placement: The tips have a 75-degree angle with an occlusal-gingival orientation, providing a more appropriate placement angle than cotton forceps. The petite, carbide tips allow the matrix to be grasped at its upper edge to prevent distortion of the interproximal area of the band.

Unbeatable Grip: The tungsten carbide tips provide exceptional grip and tactile control for tough access cases.

Matrix Forceps
BFA-1 Angled tip for occlusal placement

Ring Placement Forceps

Holds all your sectional matrix system rings.
