

AMP Activator “Sublingual AMP”

Ingredients (per 6 sprays):

Adenosine Monophosphate 25 mg.

Other Ingredients:

Purified water, xylitol, glucosamine HCL, citric acid, natural flavors, stevia leaf extract, potassium sorbate, sodium benzoate, sodium bicarbonate

How to use: 6 sprays once per day (spray under the tongue);

Features/Benefits:

- Plays vital role in ATP production
- Creates fuel for cellular energy and fat metabolism

Key Ingredients:

Adenosine Monophosphate (AMP) - research has found that increased levels of AMP can induce an increase in the activity of AMPk which works to switch cells from ATP consumption to ATP production.

Who should use?

- Add-on to any weight loss program
- Patients who have reached weight loss “plateau”
- Chronic fatigue syndrome/fibromyalgia

Brief description:

“Adenosine Monophosphate is a key component of the metabolic process and ATP production.”
