Maintenance of paper cord seat

- To clean the seat, wipe it with a damp cloth with a neutral, colorless soap solution. It is not recommended to do this too often.
- Red wine, fruit juice or brightly colored food should be wiped off immediately.
- Do not rub the liquid into the paper cord but dab the cloth gently on the stained area.
- Never use detergent on paper cord.
- Paper cord seat can be discolored by deeply colored textiles, e.g. a new pair of blue jeans. A seat cushion on the seat protects the paper cord from this kind of discoloration.
- Use felt pads to protect sensitive floor.
