

# GLITTERING FOAM

## Eggs & Bunnies

### Materials

- Glitter
- Foam eggs or bunny shapes
- Mod Podge
- Paintbrush or Foam brush
- Plate or bowls

### Prepare

- Gather your foam shapes
- If you don't have any foam shapes you can use construction paper to make your own
- Pour dime size amount of Mod Podge/craft paint onto a plate or bowl

### Get Crafty!

- Dip the brush into Mod Podge and apply thin, even layers to the foam shape in your desired patterned
- Sprinkle glitter onto Mod Podged or craft painted areas
- *Pro Tip:* If kids are helping, you can also put the glitter in a bowl and then roll the egg in the glitter
- Allow Mod Podge or craft paint to dry
- Repeat steps to get your overall desired look

### Finishing the Look

- Once your glittered eggs are dried you can add a layer of Mod Podge to the glittered areas of the egg to "seal" in the glitter
- Embellish the bunny with cotton ball tails, just add a spot of Mod Podge in desired tail placement and then firmly place cotton ball tail down
