**WARNING: GROUNDING INSTRUCTIONS**

This appliance must be grounded while in use to protect the operator from electrical shock. The appliance is equipped with a 3-conductor cord and a 3-prong grounding-type plug to fit the proper grounding-type receptacle. The appliance has a plug that looks like sketch A in Figure 73.1. An adaptor, sketch B, should be used for connecting sketch A plugs to two-prong receptacles. The grounding tab which extends from the adaptor must be connected to a permanent ground such as a properly grounded outlet box as shown in sketch C using a metal screw.

**FIGURE 73.1**

**Grounding Methods**

(A) Circuit grounding conductor connected properly

(B) Metal mounting screw

(C) ADAPTER

Grounding means AA220
When using electrical appliances, basic safety precautions should always be followed including the following.

1. READ ALL INSTRUCTIONS BEFORE USING.
2. To protect against electrical shock, do not immerse cord, plug, or main body (motor) in water or other liquid.
3. Close supervision is necessary when any appliance is used by or near children.
4. Unplug from outlet when not in use, before putting on or taking off parts, and before cleaning.
5. Avoid contact with moving parts. Unplug from outlet when not in use, before putting on or taking off parts, and before cleaning.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to the manufacturer (see warranty) for examination, repair, or electrical or mechanical adjustment.
7. The use of attachments not recommended or sold by manufacturer may cause fire, electric shock or injury.
8. Do not let cord hang over edge of table or counter or touch heated surfaces.
9. Always make sure juicer cover is clamped securely in place before motor is turned on. Do not unfasten clamps while juicer is in operation.
10. Be sure to turn switch to OFF position after each use of your juicer. Make sure the motor stops completely before disassembling.
11. Do not put your fingers or other objects into the juicer while it is in operation. If food becomes lodged in opening, use food pusher or another piece of fruit or vegetable to push down the lodged food. When this method is not possible, turn off the machine, remove the plug from wall outlet and disassemble juicer to remove the remaining food.
12. Do not use outdoors.
13. Do not place on or near a hot gas or electric burner or in a heated oven.
14. Do not use appliance for anything other than its intended use.
15. Keep hands and utensils away from moving blades or discs while processing food to reduce the risk of severe injury to persons or damage to the food processor. A scraper may be used but must be used only when the food processor is not running.
16. Blades are sharp. Handle carefully.
17. Keep the appliance clean. Refer to the Care & Cleaning instructions in this manual.
18. DO NOT plug in until familiar with all the instructions and operating procedures.
19. DO NOT unplug from electrical outlet by pulling on the cord. To unplug, grasp the plug, not the cord, and pull.
20. Turn off all controls before unplugging from or plugging into an electrical outlet.
21. This appliance can not grind meat.
22. Check hopper for presence of foreign objects before using.
23. Moving parts – Keep fingers out of discharge openings.
24. Sharp blade – Always use food pusher.
This product uses a reset switch and thermal cutoff to protect the motor.

If the unit stops running during operation, press the reset switch on the bottom of the unit.

If the unit will still not operate, unplug, wait for 30 minutes, and try again.
QUICK START ASSEMBLY

1 Hopper
2 Chute
3 Drum
4 Locking Clip
5 Auger
6 Juice Screen
7 Adjustable End Cap
8 Pulp Container
9 Juice Container
**OPERATING INSTRUCTIONS**

**JUICING FUNCTION**

1. Press [ON] button on the back of the Omega® Nutrition System to start.

2. Gradually put the ingredients into the hopper chute and press down with the pusher.

3. DO NOT place any metal objects into the hopper. If the drum set is clogged or the machine stops operating, press the reverse button 2 to 3 times and press the ON button again to resume normal operation.

4. After the extraction or processing is complete, place the switch in the stop position to stop.

   **WARNING** When using [ON] or [Rev] button, make sure that the auger stops completely.

5. Turn the adjustable end cap counter clockwise to tighten the squeeze, increasing the pressure. Turn the adjustable end cap clockwise to loosen the pressure.

6. To yield more juice from Celery, Herbs, and Leafy Greens, use the adjustable end cap with the green inner ring. Turn the end cap counter clockwise to tighten the squeeze, increasing the pressure. Turn the end cap clockwise to loosen the pressure.
This heavy-duty nutrition system features a patented, stone mill-like auger, made of hygienic U.S. FDA-approved melamine. The low speed of 80 RPMs ensures full taste and the highest nutritional value.

- **FRUIT JUICE.** Efficiently juices hard and soft fruits: even citrus fruits.

- **VEGETABLE JUICE.** Juices all kinds of vegetables including carrots, beets, celery, peppers, and radishes without destroying the natural flavor and nutritional benefits. Fresh taste and full nutrition are guaranteed with this unique extraction process.

- **WHEATGRASS AND LEAFY GREENS.** Kale, cabbage, spinach and pine tree needles are just some of the natural products that can be juiced. Enjoy the best that nature offers in raw foods and juice them for full nutritional benefits.

- **HERBS.** Celery is the most common of herbs that can be juiced. Extract liquid from raw celery stalks.

While you can juice fruits, vegetables, leafy greens and herbs to make one tasty drink, you may occasionally (or always) only juice one type to concentrate a fruit, vegetable or herb’s health enhancing benefits.

**STERILIZATION & EASY CLEANING**

**HANDWASH OPTION**

You can thoroughly wash parts by immersing in warm water diluted with one or two drops of baking soda or dishwashing soap for about 30 minutes.

**DISHWASHER SAFE OPTIONS**

When finished using the Omega® Nutrition System, simply put parts into dishwasher, on top rack.
All users of this appliance must read and understand these safety precautions before operating.

**Note:**
Even after following the directions above, if the juicer still doesn’t work, please unplug the power cord, disassemble the chamber set and clean it. Then try again.

Any other servicing should be performed by an authorized service representative.
FRUITS AND VEGETABLES
Juicing Screen | Adjustable End Cap

- Thoroughly wash fresh ingredients to remove accumulated chemicals. The Omega® Nutrition System can extract juice from un-peeled fruits and vegetables but your taste may prefer peeled produce.

- Soft produce will process easier if refrigerated.

- Cut fruits and vegetables into small pieces to fit in the drum.

- Turn [ON] machine and let it run without interruption until all juice has been extracted.

- Alternate soft and firm items. It is best to start with the softer item.

- If the pulp starts to clog the drum, turn [OFF] machine and empty the drum set. Reassemble and resume normal operation.

- After placing the last piece of fruit or vegetable into the hopper, keep the machine running for a few seconds to ensure juice is extracted.

- After every use, clean all parts that come into contact with food or juice.

- You may juice items that are not usually used in meals, for example, carrot or beet stems.
HOW TO PREPARE

WHEATGRASS AND GREENS
Juicing Screen | Adjustable End Cap

• Thoroughly wash fresh ingredients to remove accumulated chemicals.

• Do not overfill the feed chute. Feed the juicer with small quantities. Allow most of the juice to exit before pushing in the next item.

• Some juice may exit into the pulp bowl and not the juice bowl. This is normal. This may continue to occur until the ejection area is filled with pulp.

• When juicing an item for added taste, insert that item during the first half of the juicing process. If inserted at the end of the process, the full taste may not come through.

• Certain green drinks may be too strong for some people. Lemon, apple, ginger, carrots &/or beets may be added as a natural sweetener to dilute the taste of wheatgrass and leafy greens.

HERBS (such as celery)
Juicing Screen | Adjustable End Cap

Please troubleshoot using the details below before contacting Omega Customer Service for repair or service. When contacting Omega for after-sales service, please have the manufacturer’s serial number or bar code available.

The Appliance Does Not Work
• Make sure the power cord is plugged in correctly.
• Make sure the drum is assembled correctly. If the drum is not locked into place, the appliance will not operate.
• Make sure the appliance is assembled according to the instructions in this manual. Refer to the instructions.
• If the appliance still does not work, please contact Omega Customer Service for additional support.

The Drum Does Not Open
• If there is a lot of pulp inside the drum, press [On] to release the excess pulp.
• Check the appliance for any foreign substance or solid objects including seeds.
• Press [Rev] button to push up stuck ingredients.
• Do not attempt to open by force. If the drum still does not open, please contact Omega Customer Service for additional support.

The Appliance Stops During Normal Operation
• Check for large pieces of food stuck in the appliance.
• Refer to the section “If the Auger Stops Working” and follow the guideline for the [Rev] button.
• If the appliance still does not work, please contact Omega Customer Service for additional support.

Fine Lines or Scratch Marks around the Auger
• This is normal. Do not be concerned. These are molding marks resulting from the normal manufacturing process.

Juice Leaks Over the Base
• Check for an excessive amount of ingredients in the hopper and/or chute.
• If you try to juice a large amount of food compared to the pulp chute, the packing will be slightly pushed away. Juice may leak out of the gap.
• Do not force too much food into the juicer. Push food gradually for extraction.
• Check to make sure the juice flap is closed.

Juicer Shakes when In-Use
• This is normal as the auger rotates. It is not a malfunction. Hard ingredients such as carrots, potato, radish, beets, etc. may cause shaking more so than soft ingredients.
• Depending on the firmness of the ingredient, there may be a more pronounced shaking of the motor.
• Slight shaking may be caused by the motor.
