Thickness

Matte, Metallic, and Glossy: 4 mils/100 microns
Metal Flakes: 5 mils/125 microns

Special Precautions

*Columbia Blue, Metallics, Metal Flakes, and Neon colors cannot be layered beneath anything.

Tech Tips

When layering ThermoFlex PLUS, you can set the first layer for just 5 seconds, then set the second layer for the regular amount of time.

45° Blade Recommended

Cut this material in mirror image

320°F - 330°F

Medium, even pressure

15 Seconds

PEEL
Peel warm (Except Neon and Columbia Blue - Peel Cold), cover with Teflon & re-press for 2 seconds.

Wash warm, tumble dry normal. Suitable for dry-cleaning.

Test on dazzle cloth and other moisture-wicking polyesters. Moisture-wicking materials have better adhesion when washed and dried using no fabric softener or blotted with rubbing alcohol before pressing. Be advised that dye-migration has occurred with low energy dyes in polyester and poly-blend fabrics with heat transfer vinyl that does not contain dye-blocking agents.
