Salmon Oil Warning:

Some possible sideeffects could include upset stomach, diarrhea, and in some rare instances fish oil allergies, which could lead to an adverse reaction. We recommend starting off with lower doses and working your way up to the recommended dose.

Glucosamine Warning:

Consult with your veterinarian before using this product in animals with clotting disorders, a history of urinary tract stones, diabetes or any metabolic disorder causing hyperglycemia, animals being treated with anticoagulant medications, or animals with known allergies to shellfish. If lameness worsens, discontinue use and contact your veterinarian.

Veterinarian Guidance:

Please consult your veterinarian before starting your pet on any supplement or changing their dietary routine.
