ABOUT P.F. CANDLE CO.

P.F. Candle Co. is a Los Angeles-based home fragrance company owned and operated by wife-and-husband team Kristen Pumphrey and Thomas Neuberger. We believe that fragrance is an extension of your home design, and create high-quality products with accessible price points in mind.

P.F. is a completely independent business: what started as a one-woman operation in 2008 is now an entire team designing and producing our collection under one roof in Southern California. As we grow, so does our commitment to sustainability, to our planet, and to our crew who makes it all happen.

Yearly, we donate a portion of our total net profits to local and national charities. We are proud to contribute to the Los Angeles Regional Food Bank, The Natural Resources Defense Council, and the Downtown Women's Center. Each of these organizations represents issues we care deeply about; environmental advocacy, ending homelessness, empowering women, and fighting hunger.

ABOUT OUR PRODUCTS

The entire P.F. Candle Co. collection is vegan, cruelty-free, and phthalate-free, and all of our candles are made with 100% domestically-grown soy wax.

While our production methods have improved over the years, something that hasn't changed about P.F. products are the people behind them. Each of our products are developed, produced, tested, packed, and sold by our team out of our Los Angeles warehouse.

CANDLE CARE 101

Following Candle Care helps to ensure product quality + longevity. We highly recommend following each of the following steps:

- Trim your candle's wick to 1/4" before each lighting or once your candle has cooled.
- Never attempt to trim a burning candle.
- Discard the snipped portion in the trash; never leave wick trimmings in your candle jar.
- The wick should always remain centered and away from the sides of the vessel.
- Allow the wax to melt to the edges of the jar during each burn to prevent tunneling.
- Once the candle's gone, we hope you'll re-use it. Clean it out and you've got a new planter or pencil holder – or whatever you want!

Safety first - because candles burn and contain a small flame, so we encourage following these common sense rules of thumb:

- Never leave a candle burning unattended, near a draft, or in reach of children or pets.
- Don't burn your candle for more than 4 hours at a time.
- Do not allow your wick to curl over, as this can create a larger than normal flame.
- Stop burning your candle when only 1/4" of wax remains.
- Do not pick up a burning candle or immediately after it's been blown out.
- Protect the surface underneath the candle no matter the material.
