

Dear Customer,

Recent shocking developments reveal Australian factories closing down, mismanagement and political ineffectiveness combined with bad excuses are driving the negative trend. This has to stop.

We are bringing back – Made in Australia.

We as a company are ambitious to create real jobs, a workplace where people use their high technical skills to build technology-leading products. Countries overseas show us how, despite high wages, it is possible to design and manufacture products thus creating values and goods. To lead technology in niche markets and create products that are locally relevant in the first place, are key elements of success.

Wow Lightning offers High-Performance LED Lights and bespoke High-End Sound Systems Made in Australia. Starting from 2016, Wow Lightning, myself Christian Paul and Co-Director Keith Willis are seeking your support, locally, national and international, to create a new icon; Made in Australia. Therefore, please visit www.wowlightning.com, meet us at the markets in Pottsville/Kingscliff and of course, shop wild!

Thank you.
